COMPUTER ORGANIZATION								
	\bigcirc \square	\bigcirc \square	\bigcirc	(Common to CSE	2, IT)	(2)	\bigcirc \square	
	◯ │─ \Time :	3 Hours				Max. Ma	arks: 75	
Note: This question paper contains two parts A and B.								
		Part A is compulsory which carries 25 marks. Answer all questions in Part A.						
		Part B consists of 5 Units. Answer any one full question from each unit. Each question						
	carries 10 marks and may have a, b as sub questions.							
	\bigcirc	\bigcirc \square	$Q \square$	PART-A	QD	$Q \square$	QD	
10 No.	$\bigcirc \square$						5 Marks)	
3	1.a)	What is the purpose of BUN instruction? [2]						
	b)	b) Define computer organization, computer architecture. [3]						
đ	c)	Contrast 8086 minimum mode with maximum mode. [2]						
	. d)	How an addre	How an address is latched in 8086? [3]					
6 B	e)	What is the ne	ed of a linker?	Anna Inner			[2]	
1	≥ 1	What is the di	fference betwee	en a macro and a p	rocedure?	$> \qquad \sim$		
· · .	$\langle g \rangle$	g) What is the disadvantage of strobe method? \bigcirc \bigcirc \bigcirc \bigcirc \bigcirc $[2]$						
÷	n)	Provide the hardware for signed-2's complement addition and subtraction. [3]						
	i)	Draw the system has structure for multiprocessors						
41	J)	Draw the syste		e for maniprocess	013.		[-]	
	· Sand humand	PART – B

8. Show the step-by-step multiplication process using Booth algorithm when the following binary numbers are multiplied. $(+33) \times (-12)$. [10] OR Design a circuit for a 4×4 First In First Out Buffer and explain its functionality. [10] 9. A digital computer has a memory unit of 64K * 16 and a cache memory of 1K words. 10. The cache uses direct mapping with a block size of 4 words. (a) How many bits are there in the tag, index, block and word fields of the address format? (b) How many bits are there in each word of cache and how are they divided into function? Include a valid bit. [10] OR Does pipelining get affected by data dependencies among the instruction? Justify your 11. answer with lucid examples. [10] ---00000----
